Madras School of Social Work

Sub: **Acknowledgment Letter of Collaboration**

Dear Sir,

Greetings from Psyhub Brain and Behaviour clinic!

We are delighted to associate with the Department of Counselling Psychology of your esteemed institution **for the upcoming internship programme.** Psyhub Brain and Behaviour Clinic was started with the idea to rehabilitate those with psychological disturbances and also to contribute to the field of Mental Health by creating more awareness in the society by conducting Online Courses, Internship Programmes and Seminars.

Psyhub would like to continue the association with your institution by offering our internship programme and Short Courses for the students of psychology. Our programmes are holistic in nature and cover both theory and practical aspects of the subject. It also helps the students to be "industry ready" as they finish their studies. Students get to observe the counselling sessions, learn and conduct psychometric assessments, project work and gain the experience of working directly with the clients. The partnership would contribute immensely to the field of psychology, develop the knowledge and competency of the students and also in the growth of Psyhub.

Psyhub would also like to join its forces with your Institution in bringing awareness and breaking the stigma towards Mental Health through Workshops, Seminars and Conferences.

Looking forward to hearing from you.

Thank You.

Sincerely,

(Dr. Nappinnai)
